

End of Production Notice

February 23, 2022

End of Production Announcement for Agilent Seahorse XFe96 analyzer

In 2006, the world was introduced to the Seahorse Extracellular Flux Analyzer. This instrument soon became a gold standard for mitochondrial research and enabled advancement of the field of cellular metabolism. With the newly released Agilent Seahorse XF Pro analyzer, we usher in an enhanced platform delivering optimized measurement performance, an advanced user experience for collecting XF data, new experimental setup, design, and analytical tools, and new kits, reagents and workflows.

This letter is our first announcement for the pending discontinuation of the Agilent Seahorse XFe96 analyzer. Rest assured, this communication is only the beginning of our Agilent Value Promise as you will have opportunities to service your instrument and conduct experiments with XF consumables for years to come.

NOTE: Seahorse XFe96 Analyzer (S7800A [101991-100]) has already passed the end of production date.

| Product or Model Number | Product Description |
|-------------------------|-------------------------|
| S7800B | Seahorse XFe96 analyzer |

| End of Production | End of Guaranteed Support | Predicted End of Hardware Availability** | Predicted End of Cartridge Availability** | End of Support |
|-------------------|---------------------------|--|---|----------------|
| (EOP) | (EGS) | (PEPA) | (PECA) | (EOS) |
| 5/15/2022 | 5/15/2029* | 5/15/2032 | 5/15/2032 | 5/15/2032 |

* Parts for Seahorse XFe96 analyzers are expected to be available after 5/15/2029 but supply cannot be guaranteed.

** These dates are estimates based on part and supply availability

For further assistance regarding post-EOP support plans, you may also visit:

<https://www.agilent.com/en/services/crosslab-instrument-services> or call (800)227-9770 (US and Canada).

Please reach out to your Agilent representative with questions and to explore opportunities for upgrading to an XF Pro.

Thank you for your business. We appreciate your loyalty to Agilent's Seahorse products and promise to make your experience with Agilent the best it can be – for years to come.

Sincerely,

Ned Jastromb
